I need to explain the same issue like a broken record again and again to different support executives. there are no proactive follow ups on one issue. No continuity. All the person does is say that he will connect with the concerned team and nothing happens. And guess whats the best part.. My issue is still not solved..."

so bad experience very bad support"

> "One of the worst customer support experiences I have ever had with Groww. It is extremely difficult to communicate and explain the actual problem to the support team. Even after explaining the issue multiple times, they often fail to understand the problem, and the response comes only after 3?4 days. Most frustratingly, even after waiting for several days and repeatedly following up, the issue remains unresolved and no proper solution is provided."

3. Onboarding

> "worst app I am trying to contact support team to change my login credentials as registered mobile number and mail id not in service anymore, but they didn't reply."
