REPRESENTATIVE USER SENTIMENT

"ALERT notification not working. other notification coming in groww but not alerts it's enabled in setting but not coming it's happening again"
"Groww UI is good and simple for new users. The app has introduced many updated features over time. However, I am giving 1 star because of poor customer support. Whenever you raise a ticket, customer support asks for the same information again and again. Repeating details 2-3 times is understandable, but asking for the same information 5+ times is frustrating. Additionally, representatives often do not answer the actual questions and instead provide random or irrelevant responses."
