> "F&O Trap & Broken UI State As a stocks/funds investor, critical flaws ruin this app: F&O Trap: The F&O section has an "Activate" button with zero confirmation popups. One misclick triggers 24hr activation with no cancel option. Broken Segments: After misclicking, all segment checkboxes stayed ticked. Even after calling support to deactivate, the UI never updated, causing confusion. Sync Issues: Backend states fail to sync, hurting trust."
