- **Voice of the Customer:**

> "This app should be banned." Fraud is always honored in India Fake Trading Platform! This app uses fake charts and manipulated data to make you lose money. They demand extra "taxes" or "fees" when you ask for a withdrawal and then stop responding. Stay far away! 100% Fraud App! They steal your money under the guise of trading investments. Customer support is useless and only exists to trap more of your money. Save yourself and avoid downloading this Brokerage is also charged on top of that."

> "This is the worst app. Buying is one price, Buy is another. If you buy, the price falls, if you sell, the price rises. No one should download this app, which is full of fraud and deceit."

Second, their customer support is practically non-existent?I have been trying to call them continuously for over 20 minutes and nobody is picking up the call. Highly unreliable platform for active trading. Pathetic service and zero accountability for technical glitches!"

Support tickets are closed with canned, automated replies without resolving the issue. Basic portfolio filtering and sorting tools are missing. Importing funds is useless if invested values are wrong."

> "they should improve 1 thing, the account money in groww should be able to transfer in bank account on saturday and sunday!"

> "Very Disappointing Experience with Groww I bought shares for ₹200 and held them for 5?6 days. When the share price reached ₹220, I sold them expecting to receive my profit. However, after the transaction and deductions, I received only around ₹177 in my wallet. I understand that taxes and other charges may apply, but the deductions were very disappointing and were not clear enough to me. I bought at ₹200, sold at ₹220 after 5?6 days, yet the final amount I received was even lower than my origi"
